PROFESSIONAL SUMMARY

Results-driven IT Support Specialist with 10+ years of technical operations experience and a BSc in Computer Science. Proven expertise in Active Directory administration, remote user support, ticketing systems, and network troubleshooting within high-security, high-pressure environments. Currently provide Tier 1/2 technical support for 100+ users while maintaining strict SLA compliance and security protocols. Seeking to deliver exceptional remote IT support for global distributed teams.

Key Differentiator: Unique blend of technical IT skills + security-cleared discipline + 4 years of remote/online education experience = ideal candidate for remote-first companies.
